

# Traffic X Suite Quick Start Guide

---

## Introduction to Traffic X Suite In A Nutshell

The simplest way to understand Traffic X Suite is to know its purpose. In a nutshell, Traffic X Suite is used to rank our sites, blogs, articles, and more.

With Traffic X Suite we make many blog accounts on “free blog hosts”. We then post articles to these blog accounts with Traffic X Suite and leave links back to our sites, blogs, articles, and more. Doing this gives us more “link juice” helping our page ranking in search engines.

Traffic X Suite will find blog hosts to make free blog accounts on. Traffic X Suite will sign up for blog accounts and automatically activate these new blog accounts. Traffic X Suite will also let us post articles to these new blog accounts and leave links to any of our sites to rank them.

So again, in a nutshell, Traffic X Suite allows us to rank higher in the search engines, which in turn brings us traffic, and ultimately money.

Secondly, you can make money on the blog accounts themselves by posting articles with your affiliate links in them. We have two programs so far which allow you to post money making articles on your blog accounts. Movie Article Maker V2 comes free with Traffic X Suite. The second program is called Amazon Article Maker X which currently is not for sale and was sold to only a limited few.

You can get your free copy of Movie Article Maker V2 at the site below:

<http://www.seomunchies.com/traffic-x-stuff/>

You can use the same license information that you use for Traffic X Suite with Movie Article Maker V2. Please read the Movie Article Maker V2 manual to learn more about MAM2.

You can check out our forum at seomunchies.com to find out how other clients are using and making money with Traffic X Suite.

You can find all the manuals to the Traffic X Suite in the C:\Traffic X Suite V3\manuals folder.

## Quick Start

1. The first thing you will want to do is start The Scout. Please refer to The Scout manual.
2. The second thing you will want to do is read the How to Setup Catchalls manual in the /manuals folder. You will need to setup a catchall email address and at least 15 catchall domains.
3. Next, you will want to run Traffic X Base. Read the Traffic X Base manual for more information. I highly recommend that you enable the Community Verified MU Hosts feature when using Traffic X Base.
4. While you are running The Scout and Traffic X Base you will also want to run Base Verifier. So go ahead and setup Base Verifier and run it. Please read the Base Verifier manual.

5. Once you have created 10,000+ blog accounts please read the "Traffic X Marketing Manual" to find out one way you can make money with Traffic X Suite.

There are many ways to make money with Traffic X Suite. Please check out our forum at:
